Gott (US Patent 6,175,310) teaches leak detector with testing portion long axis extending in a different direction from another portion as shown in figure 2D. However, the testing portion does not extend in a different direction "than the long axis of [a] handle" as in the instant invention.

Seiger (US Patent 2,127,538) teaches testing portion extending in a different direction from the long axis of handle 16 as shown in the figures. However, the different direction is on a short axis. The long axis of the test portion is in line with the long axis of the handle.
